

Explain: The game can or cannot be played and people can be as into it as they like. There are 3 locked boxes. To open them, make yourself aware of everything that is being said, everything that is being done, and everything that is on the table. We are looking for puzzle pieces- each piece will have a picture of 1 of the plagues plus 2 blank- which will then create a puzzle that has the clue to open the box and eat the afikoman. Yay!

Game: By yachatz- hide the afikomen and lock it in a box.	How To Open:	What Is Inside:	How To Use The Contents:	
box 1	Key	7 menchie's with boils	later u will need to count up all the maakos to use for last box	Im splitting these 7 menchie's in 3 boxes so I will have 3 x box 1 (ab and c)- each with their own key and lock to get more tables involved bc this is the first/easiest box...
Box #2	on wine bottle neck will be small label with icons from seder plate. On table will be card with how to set up seder plate. Each item has a number... the label has -onion-egg-zeroah- 632	time line photo of exodus	Count how many people or items are in each image.... The next code is therefore: 1321	
Box #3	Code that we got from Box #1- 1321	10 plagues order	use to tell u order of lock - for the animal/grasshoper code... amount of animal, grasshoper...etc	
By 10 Plagues throw 3 frogs, 4 wild beast and 2 grasshoppers			later u will need to count up all the maakos to use for last box	
Box 4	Count the amount of frogs collected from the boxes and on the tables.... That will be the first digit.... Count the locust... that will be second digit.... 3472	Afikoman!
