

Welcome to The Model Matzah Bakery

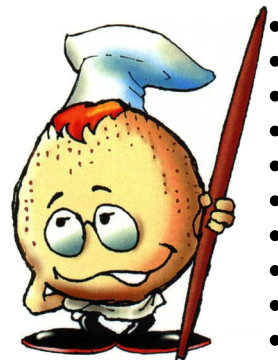

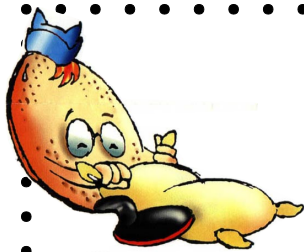

The first thing we did was wash our hands and put on hats and aprons

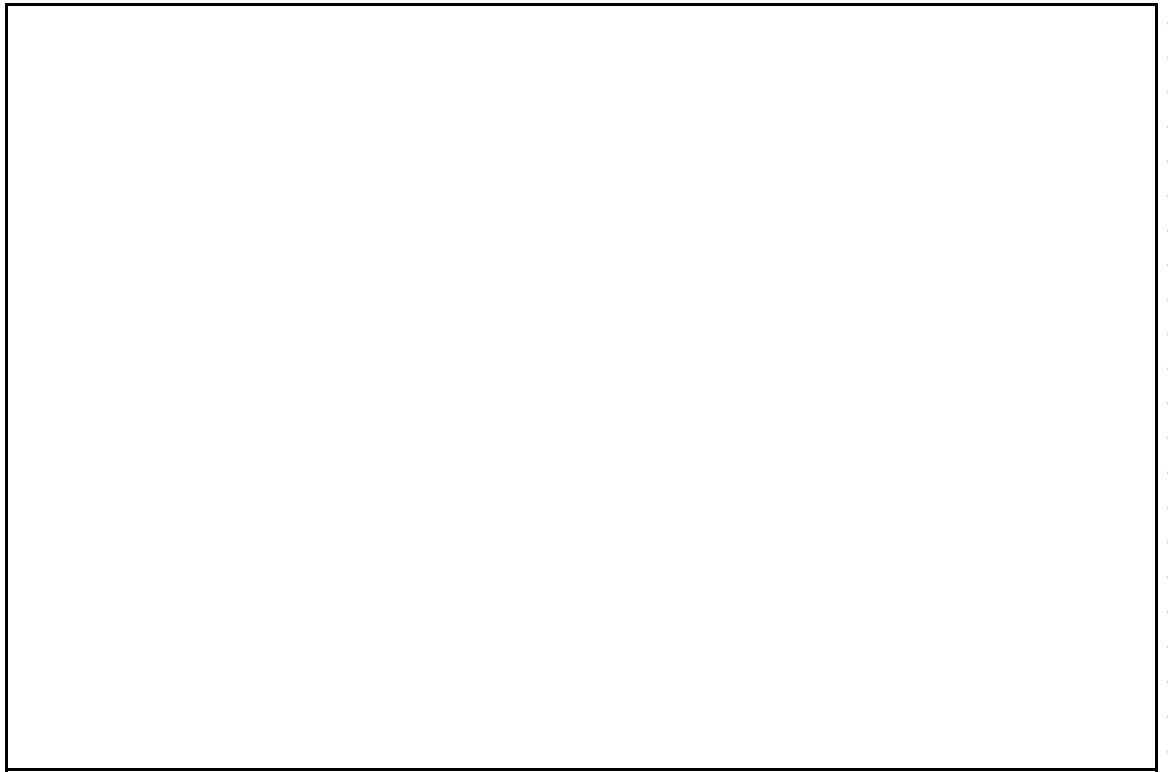

We learned all about the process of making flour,
beginning with fresh stalks of wheat

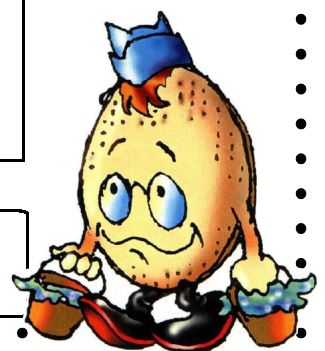

The Matzah is made with only flour...

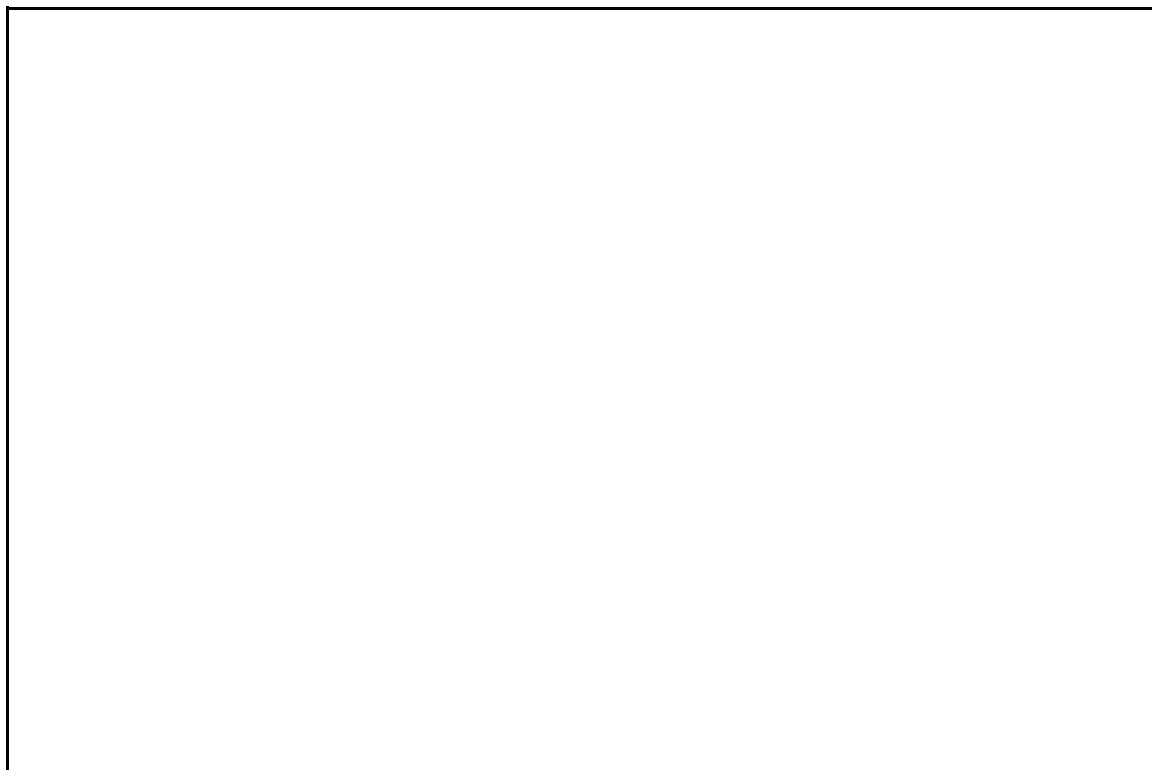

...and water

We mixed the dough by hand...

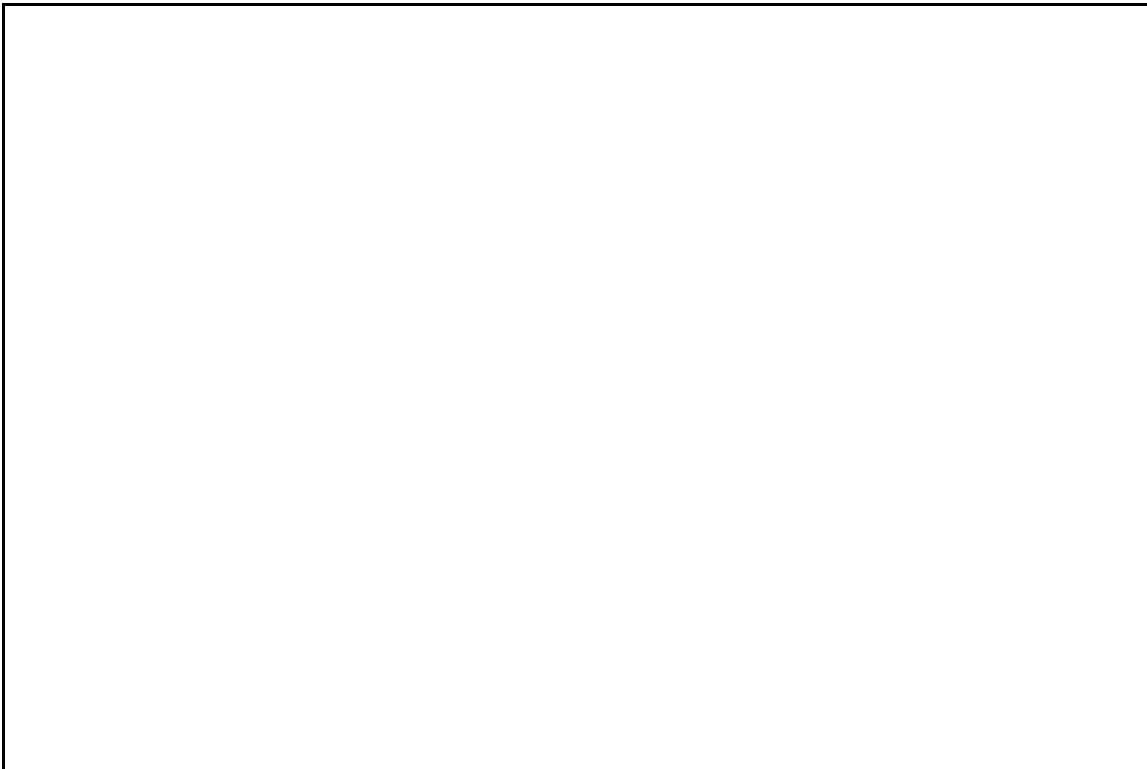

...then we each got our very own piece

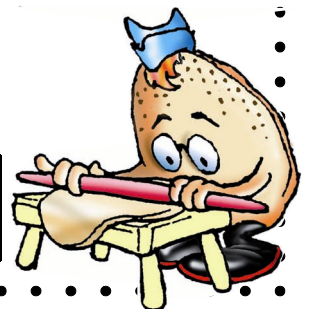

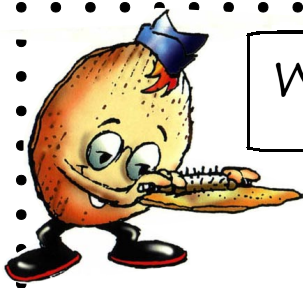

We rolled and rolled...

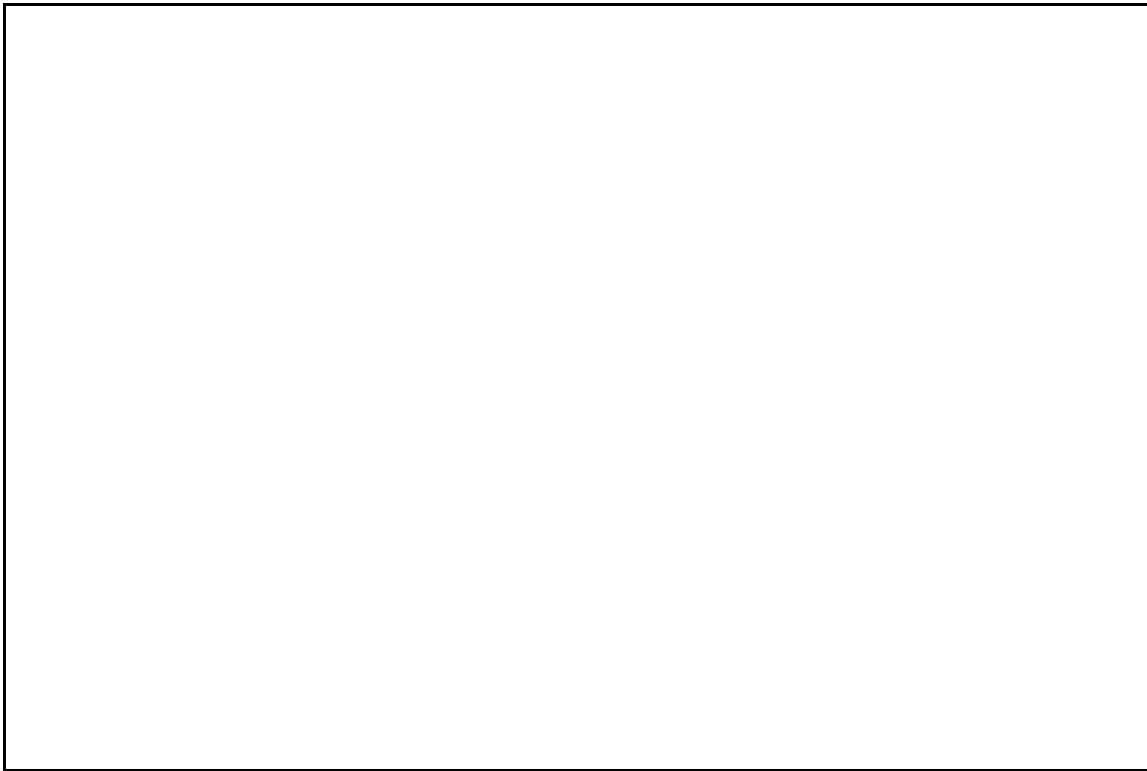

...until they were nice and thin

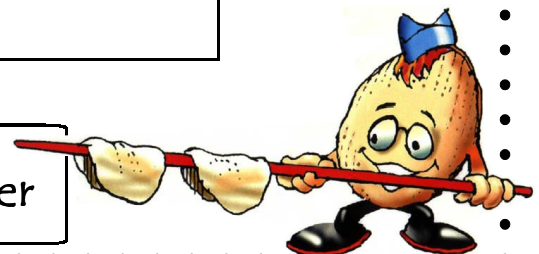

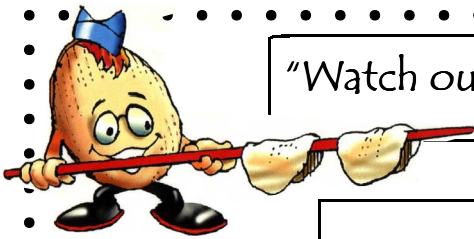

We made many holes in the Matzah to keep it from rising

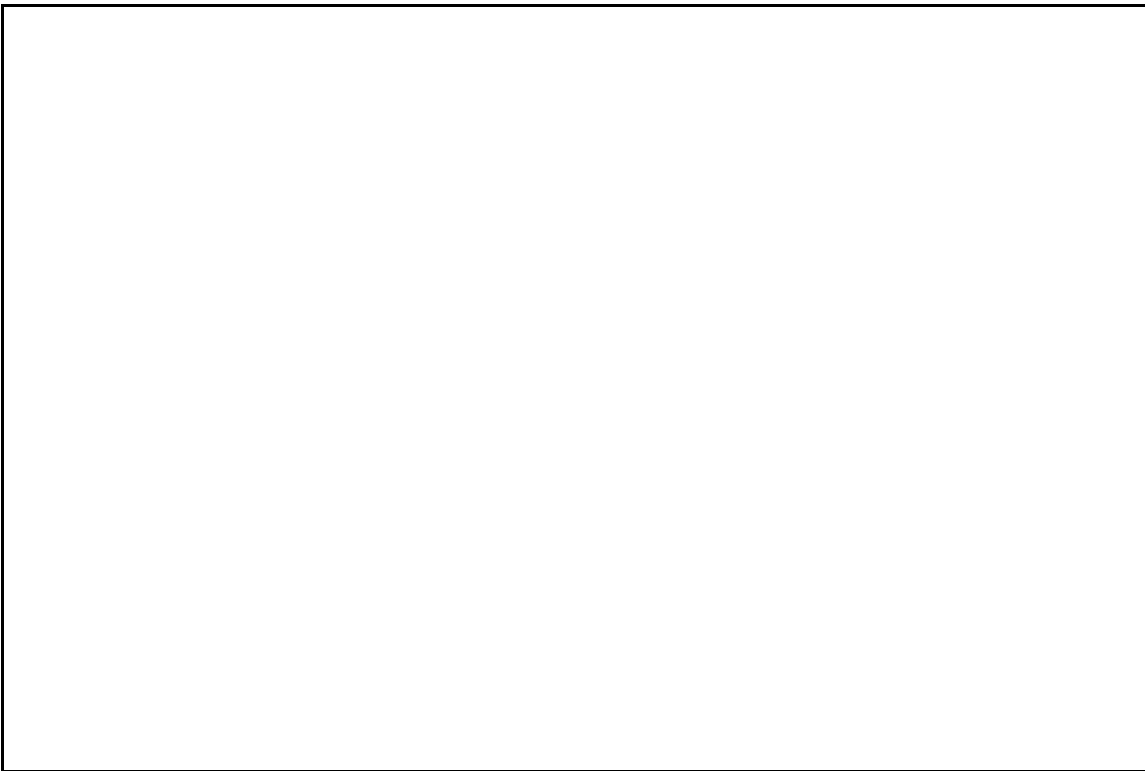

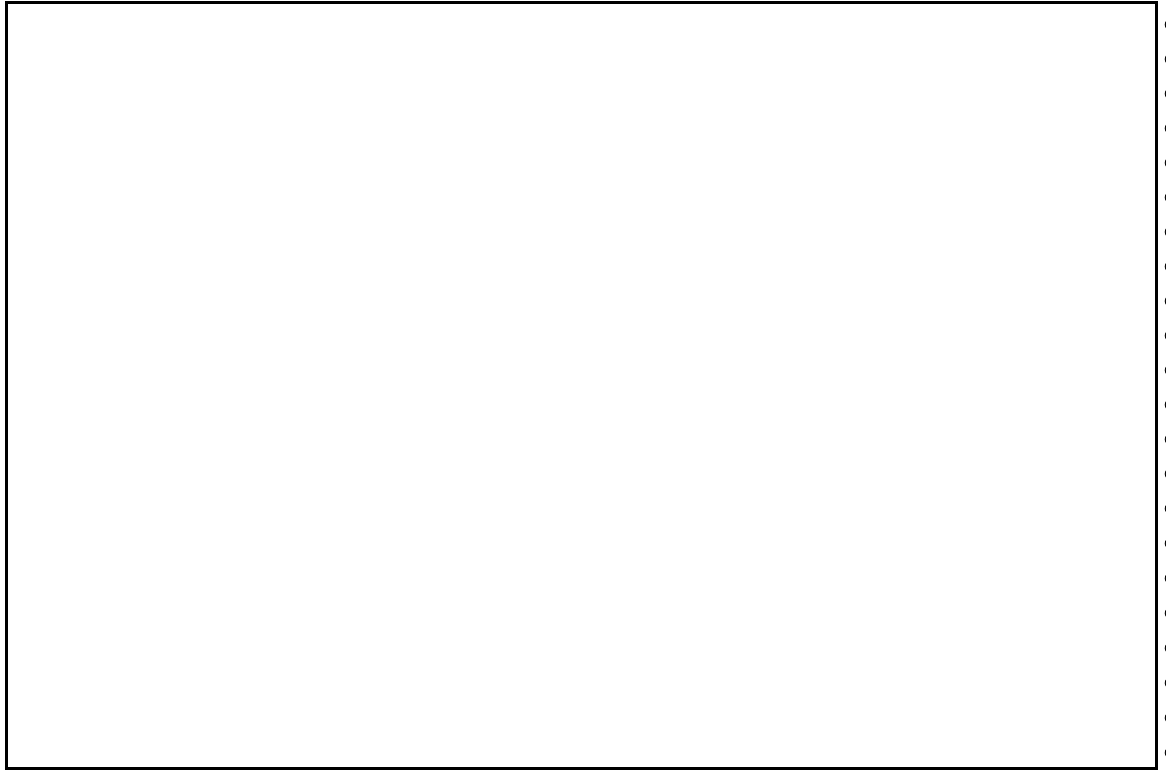

And then carried them over to the baker

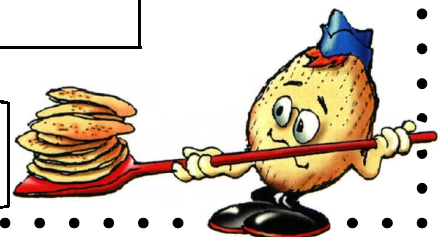

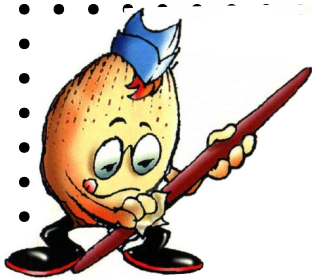

"Watch out, it's hot!" said the baker as he put them into the oven

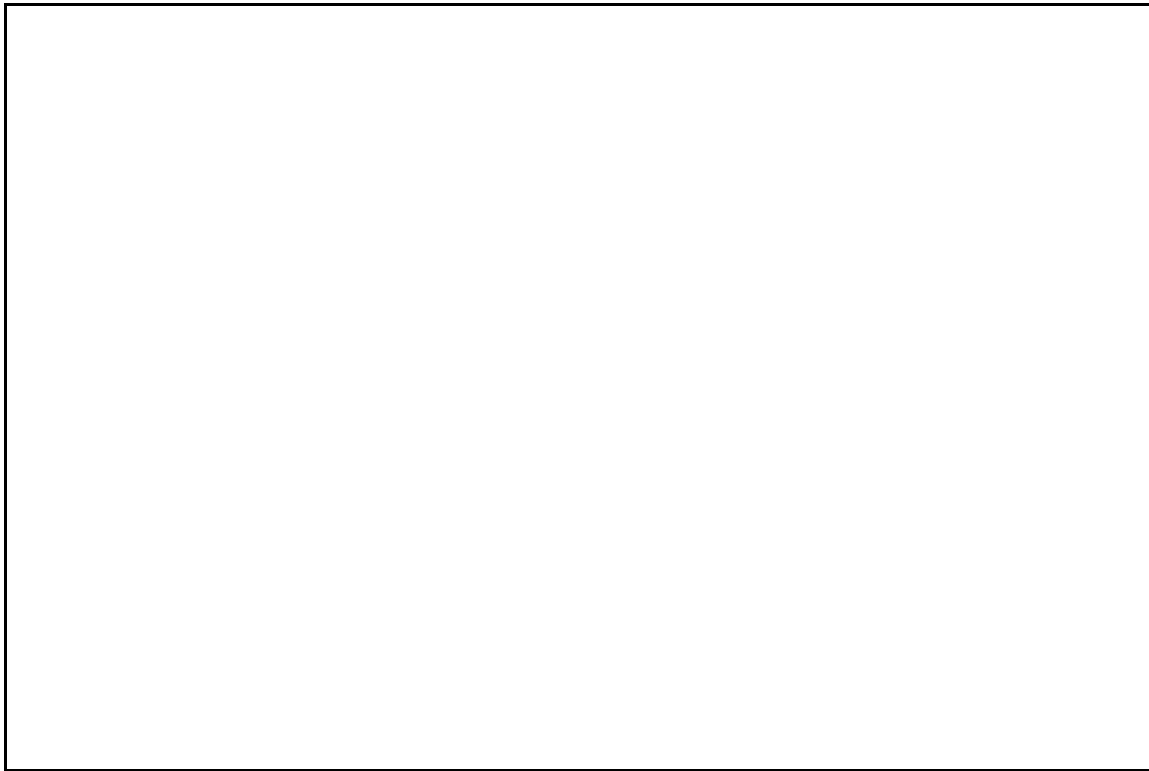

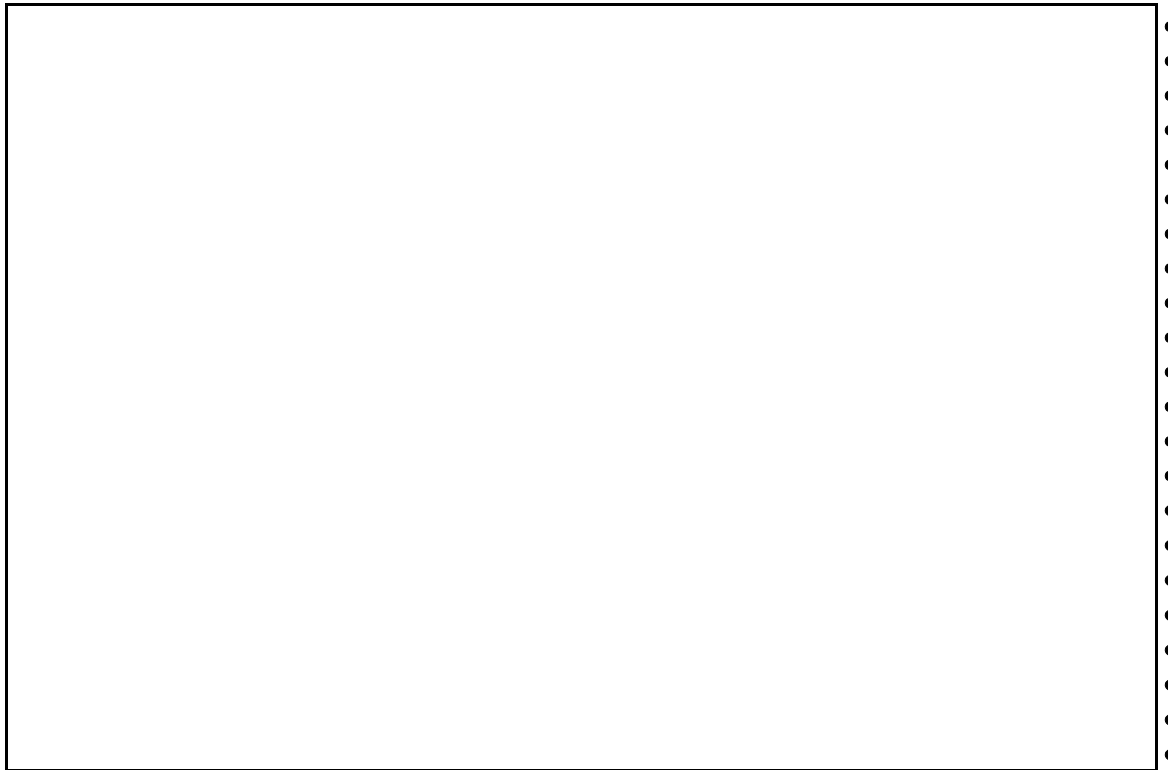

After just a few moments we had fresh crispy Matzah

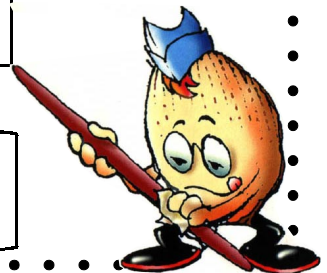

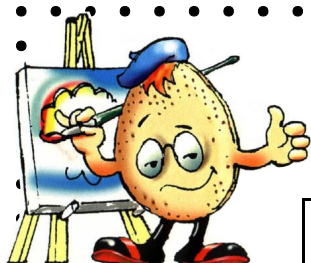

Then we sanded down our sticks...

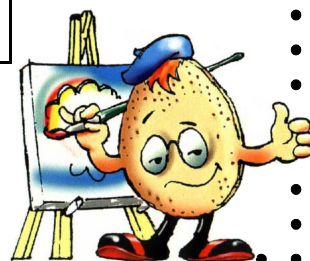

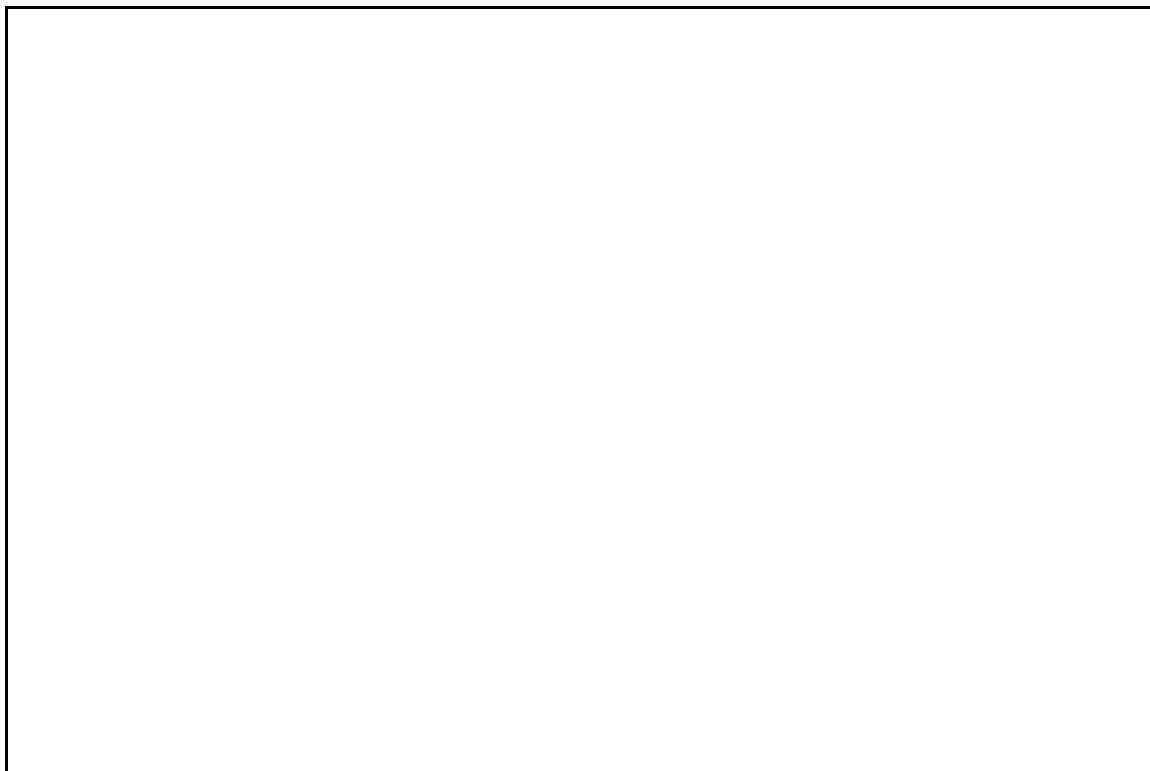

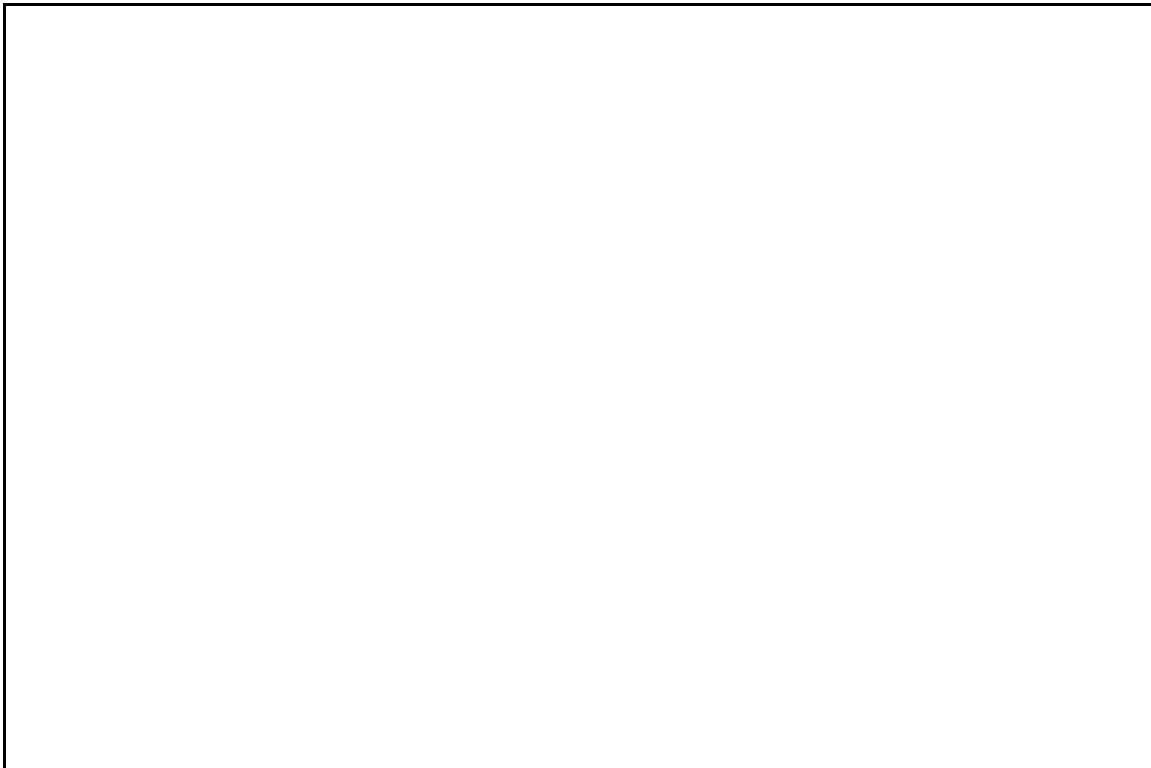

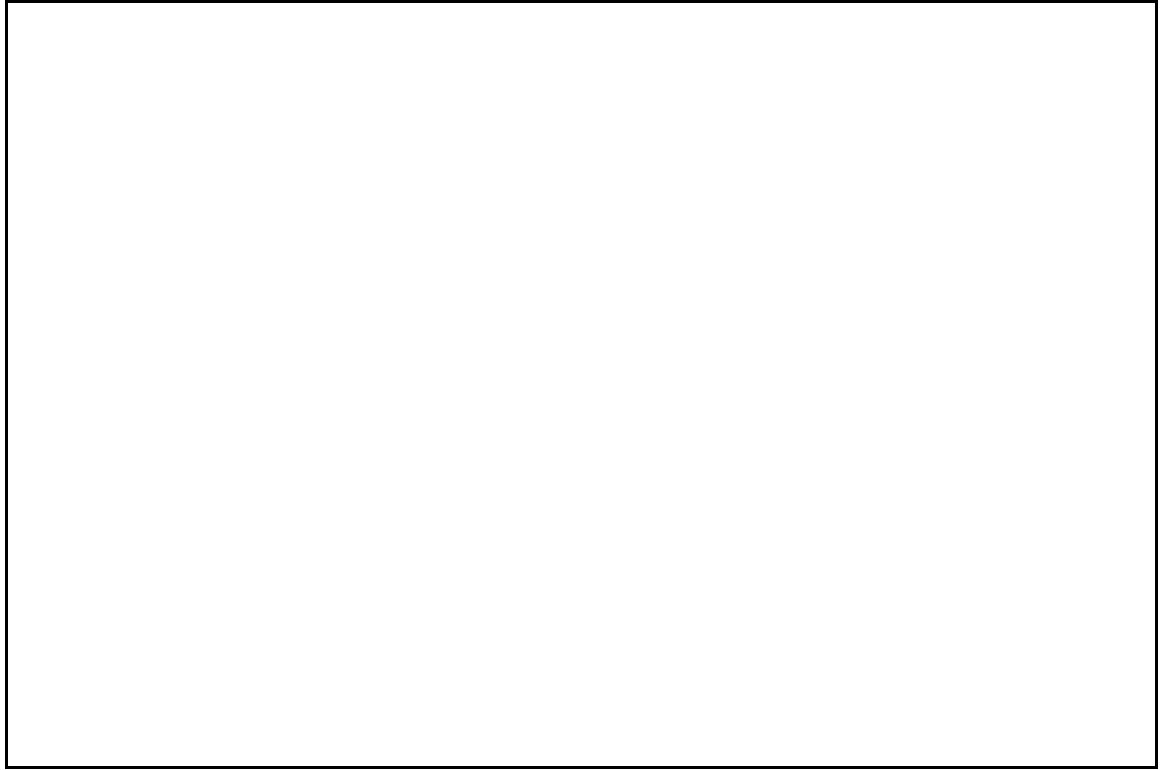

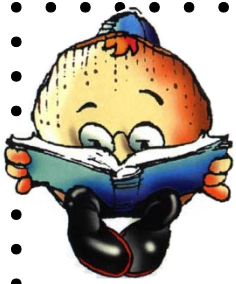

...to insure no Chametz was left on them

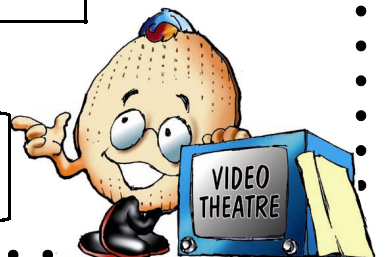

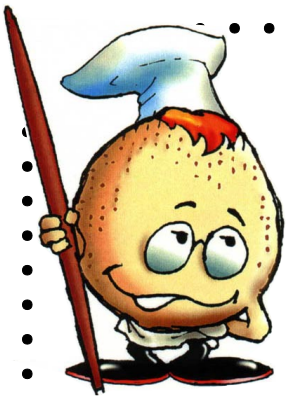

We made a craft

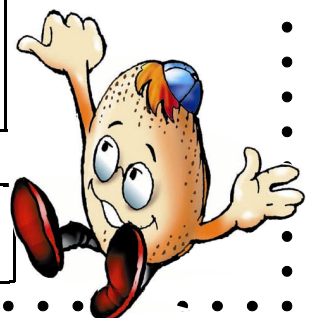

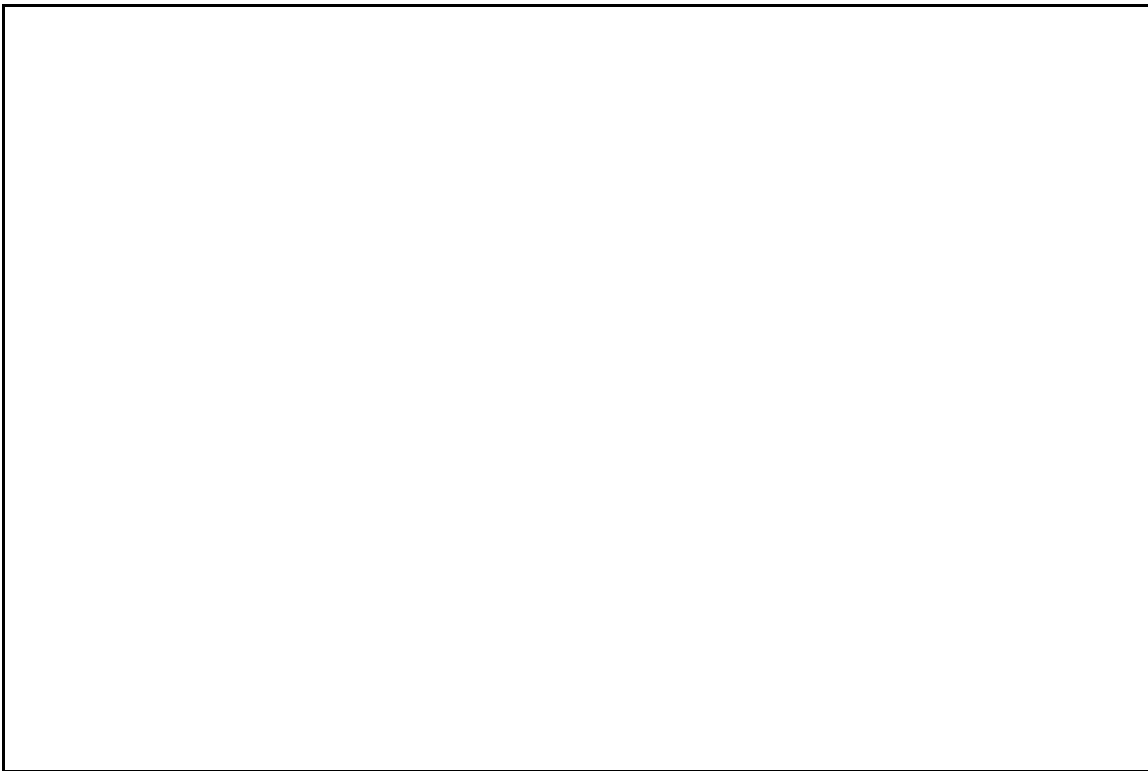

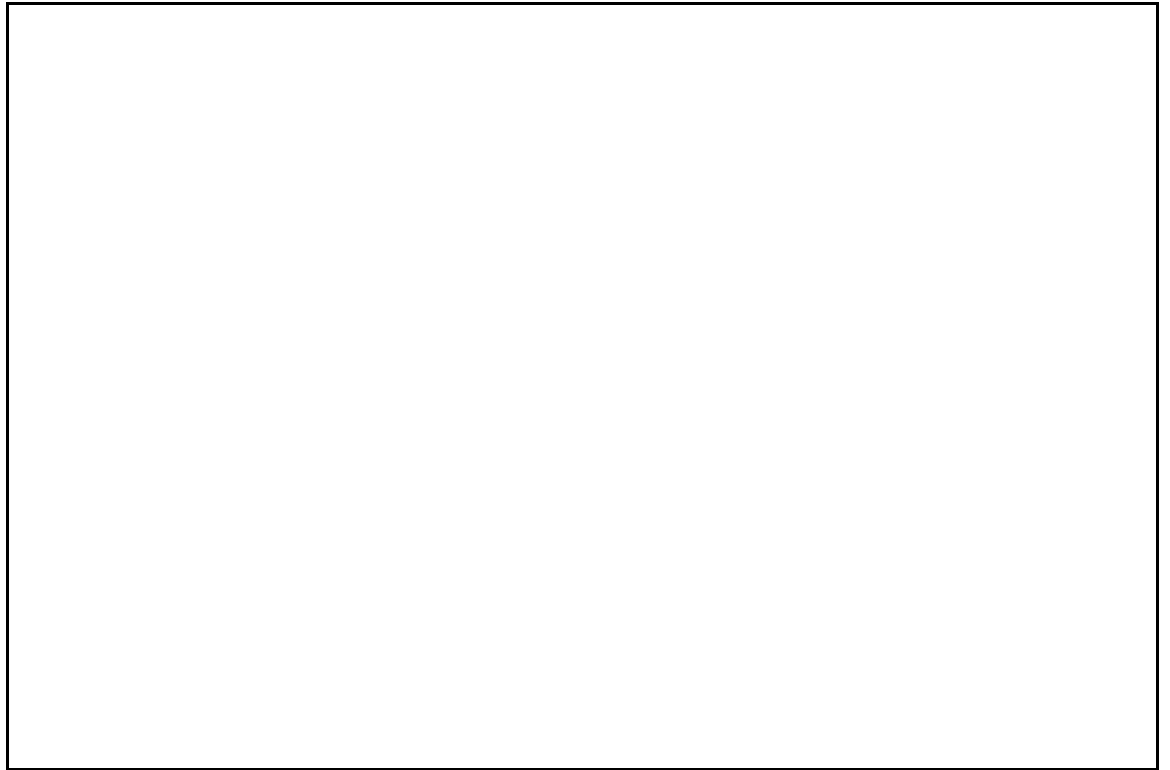

We watched a video

What a great time we had...

...at The Model Matzah Bakery!
